

Electronic Prescribing System

From June 2015 a new system has been set up to provide a more efficient and consistently accurate system that is better able to cope with the continuing increase in prescription volumes.

Prescriptions will be raised by the GP Practice and then sent automatically to the chemist of your choice; you can then collect your medication when ready.

You are asked to nominate a chemist as soon as possible; you can nominate any chemist of your choice; however we have listed our local chemists for your information

Please ensure that we have your correct address and telephone numbers on our system, as any differences will prevent the electronic prescribing system from uploading.
